About This Game

After reluctantly battling dragons, Mayan gods, and becoming a knight of a long lost Holy Order, unwitting hero George Stobbart determines to settle down to a life of mundane 9-5 office work. Who would have thought that a mysterious and beautiful woman would enter his life; a woman whose sudden disappearance draws him into a desperate search for a nefarious artefact of great and terrible power?

As forces of ancient worlds and past forgotten myths clash, current emotions will conflict with past regrets. Emotion, humor, and puzzling combine to draw the player into a dark world of conspiracy theories, daring adventures, and ancient societies. For George, it looks like the world needs saving. Again.

Key Features:

- The fourth installment of the legendary series – available in stunning 3D

Do not buy the game is Broken and Steam offers no support. they will give you a big run around and then tell you to talk to Paradox. it took them a month of BS before they told me today to contact Paradox.. Short, strange puzzle game with horrible performance. Can't recommend it.. This game is one of the best 8-bit shooter games out there for Steam. I actually found this game when I was 9 or 10, when it was still a flash game on many small websites. I was amazed by it's shooter addiction and gameplay it had towards me, and immediately loved this game from the start. I was actually surprised when I found it on Steam, but not surprised because it's such a fun game. The graphics and music are really good and match the game up well. The plot's very simple, but intriguing with the Bros trying to get back to Earth. There's also a password system where you can go back to a previous point or get ships, which comes in handy when you have to leave your game or get a game over. Only thing I recommend is to make the game longer because it takes about a hour to beat without game overs in one run, but still has lots of replay value when it comes to playing different difficulties. A total recommendation to gamers looking for a good shooter to try, and especially because Pixeljam made Dino Run, another game I love. I hope Pixeljam continues to work on update 1.5 to make the game bigger, keep up the good work.. Fuel is at center of many wars.. I love this game I just wish it was multiplayer and I could be fighting with a friend not just me.. "All Games > Casual Games > Night of the Shrub Part 1"

I wouldn't call this much of a game.. Amazing game with engaging mechanics and fun game play! Definitely worth a try for everyone, will keep you entertained for hours on end!. Played for 5 min and I'm already laughing.

Haven't try multiplayer yet, can't find a friend who wanna get penetrated by me or wanna penetrate me.. To get an idea of what really started it all, this is the game to play. For todays standards this game can still compete with some of the crap thats currently out there. I wouldnt say there is any long term potential left for this game though, short vacations is about all its worth, short vacations with friends makes it even better.. Not bad game. ai sucks and my system well meets over the maximum requirements but still moves like i meet less than minimum

Essentially 4 entirely different characters packaged as 1. Sektor, Cyrax and Smoke have all of their classic moves, whereas Cyber Subzero is fun, but more of a novelty imo.. it puts how artists think and work in to context that shows you ways to improve in drawing new things.. 9/10

This is a very interesting read if you like the idea of being a pirate and managing your own fleet of ships, crew, etc. I'm not even super into pirates and found this story easy to get into and fun to replay. It feels very "Pirates of the Caribbean" but in a good way.. A fun puzzle game in the style of tetris. Nice gameplay with a lovely soundtrack.. Played Patrician III several years and i love the game. Some aspects are far better and few i didnt liked like we cant anymore use our material to construct ships and buildings but the game is awesome anyway.. I genuinely love this game! It somehow manages to combine RPG, monster collection, strategy, crafting and farming into one neat package. True, some of the graphics are a little rough, but I think this is a game that values story and gameplay over pretty graphics.

A brilliant example of what you can do in RPG maker!. WHAM is like Heroes of Might and Magic, but in REAL-TIME, 3rd person and a slow-time system for amazing strategic battles! Dota styled (single player) combat for the outposts.

So after playing the game for 4 hours i can say the game is good for one guy doing it. Its fun and can be hard the UI is pretty hard to get used to very hard to heal when all units are grouped up. Gameplay is unique it is like homm but just real time. Units are unique have power and spells only that unit has. For a small indie game by one guy its pretty well done.

SNOW area is where its like dota u need to build turrets and fill up barracks with units than it will spawn creep waves based on stack of units in the barracks..after understanding the moba elements in the game its no so bad. just get over the whole AAA stigma you want this game to have. Can it be better well yes but could it be worse and thats a yes as well. Overall its a fun deotur from the normal games in this genre its unique and different in good ways. Rough but not bad.

I would say if your curious watch some videos and do some research its functional and works which is more than what i can so for alot of AAA titles recently. Its obvious from the start its a single mans game cuz its rough but by no means unplayable or bad just lacks polish but in the end its different and unique and if u like homm or kings bounty it is very similar.. As a YT'er I love this game, 39+hrs in and still having fun. it's mix of Rust and 7days2die but on water. Keeping in mind it's a work in progress I would totally rec. this game to play! If you are looking for a light fun game then Landless is for you! CodeBullet keep up the awesome work bro! totally love the Jesus out of this game!. best chinese single ARPG ever
